

Post Appointment Task I Postdoc Expenditures

Policy as of 11/14/2023

Recognizing that finishing and reporting research results often occur near or even after official appointments are completed, limited publishing and conference expenditures will be permitted after the completion of Task I Postdoc appointments*. Conditions include:

- All expenditures must occur within the current Cooperative Agreement
- Expenditures must not conflict with next appointment policies and procedures (e.g. Federal government restrictions on external travel reimbursements)
- Expenditures are limited to journal publishing costs and presentation(s) at a conference
- For publications, papers submitted before the end of the appointment are eligible and must have a CICOES contribution number
- For conference related costs, all expenses must be claimed within 4 months of the end of the appointment
- All expenditures must be paid from the Postdoc's research allowance and proof of sufficient funds has to be submitted with authorization request(s) or expense claims

*Task I postdocs are defined as those who applied for and were awarded CICOES Fellowship postdocs through the University of Washington. All such postdocs would have had a specific research allowance allocated in their offer letter
